FULL-SIZE ESTATE CAR WITH EXCELLENT GREEN CREDENTIALS

The newly designed Volvo V70 is available with numerous features such as digital multifunction instruments, mood lighting and an electrically heated steering wheel.

The powerful V70 Bi-Fuel version with 213 horsepower offers all the comfort, driving pleasure and highway performance you would expect from a Volvo. The Volvo Bi-Fuel system, which enables the vehicle to

run on either CNG/biomethane or petrol, offers a total driving range of 1.150 kilometers. When renewable CNG (biomethane) is used as a vehicle fuel, greenhouse gas emissions are reduced close to 80 percent compared to petrol.

Choose from a full range of equipment levels and accessories for your Volvo V70. The Driver Support Package makes one of the world's safest cars even safer.

Fuel consumption: l/100 km mixed driving (man/aut):
8.1/8.4 (petrol), 8.8/9.1 (CNG) CO₂ g/km, man/aut:
189/197 (petrol), 157/164 (CNG)
